Identified Gaps

Agentic AI GTM Strategy Critical

Your assessment reveals a 23% gap in leveraging AI-native prospecting tools. With 78% of Enterprise deals now influenced by AI-driven discovery, this directly impacts your close rate.

Discovery-to-Value Loop High Priority

The speed from first meeting to validated business case averaged 18 days in your responses—top performers close this loop in 7 days.

Multi-Threading Strategy Moderate

Your deal architecture shows strong executive alignment but limited technical champion development. This creates single-thread risk on complex deals.
