

REVENUE GROWTH PROPOSAL

"A successful sales team is a group of many hands and one mind"

Prepared for: Kevin Keyes and Sales Leadership Team

The Objective: **AE Digital Sales Excellence**

Individual talent wins segments, but a unified revenue architecture dominates markets. We are deploying intellectual infrastructure that transforms twenty-one distinct contributors into a singular, synchronized engine of strategic execution. Our objective is to stabilize and scale the discovery mechanics, ensuring that every digital-side opportunity is captured, quantified, and closed through a unified execution system.

Target Audience & Scope

- **Role:** Individual Contributors / Account Executives.
- **Team Size:** 21 participants.
- **Location:** In-person (Los Angeles, CA).

Core Objectives

Transform your team of 21 Account Executives into a unified, high-output force. The primary goal is to **boost confidence and technical proficiency** in modern business development, with a focus on:

- **Digital/Non-Linear Growth:** Specialized focus on navigating and closing digital-side opportunities.
- **Full-Funnel Mastery:** Enhancing skills across the board, from initial prospecting to final closing.
- **New Business Development:** Equipping the team with a refreshed toolkit to identify and secure untapped revenue streams.

The Solution: **The Revenue Execution System**

Most sales training is generic and pushes a single methodology (like MEDDIC, SPIN, Challenger, or Sandler). These frameworks help with overall understanding, but no single methodology works across every stage of a complex tech/digital sales cycle.

At TALSMART, we focus on the **specific skills required at each stage of the digital sales process**, because selling a digital solution is distinct due to its intangible, recurring (digital, tech or software) nature, often involving long, complex, B2B cycles focused on solving specific business problems rather than just selling features.

And before you know what to improve, you need to diagnose where the reps stand w.r.t the 4% industry elite, pertaining to their understanding of each sales stage (Prospecting > Qualification > Discovery > Solution/Demo > Negotiation-Close)

Sales methodologies explain what to do. We build the skills and execution systems needed to win at every stage of the deal because winning complex deals requires different capabilities at each step.

The Transformation Roadmap

Phase 1. Revenue-Gap Diagnostic

*Identify precisely where revenue is leaking in the digital pivot → **Identify the Gap***

- Elite Benchmarking: Quantify where the team stands against the 4% industry elite.
- Signal Leak Map: Pinpoint where deals stall—Prospecting, Qualification, or Discovery.
- Outcome: A structural blueprint of your team's specific "Revenue Gaps."

Outcome: A clear map of what must change to unlock growth.

Phase 2. Tech Sales Mastery Program

Upgrade the team's selling capability → **Strengthen the Skill**

- Structured training built to focus on specific skills required at each stage of the complex digital sales process
- Objection handling, deal strategy, and competitive positioning
- Neuroscience-based learning to make skills stick

Outcome: Modern Digital Sales Playbook - Building skills and execution systems needed to win at every stage of the deal

3D-Neuro Models

Business Environment Analysis Model

Lead Quality Analysis Model

Phase 3. Sales Execution Reinforcement

Decouple revenue yield from human burnout through consistent support → **Drive Execution**

- Systemic Coaching: Direct alignment sessions with elite sales operators (Google, IBM, Oracle veterans).
- Execution Reinforcement: Preventing skill decay through live deal reviews and pipeline strategy audits.
- Outcome: Consistent, high-status execution across the entire LA sales organization.

Why TALSMART vs. "Regular" Sales Training?

We bring a combined 100+ years of enterprise sales leadership from **Google, IBM, and Oracle** and others your team sells to or competes against.

We architect the signals that drive growth.

Jason

IT- Sales Trainer & Coach

For over 25 years, Jason has been in a corporate area and has co-founded two start-ups. Jason has also helped numerous businesses and individuals grow. Jason has helped transform...

Bryan

Tech- Sales Trainer & Coach

Bryan began his career with 14 years of extensive experience with IBM as a super salesman, a "people" manager, and a sales instructor at IBM's national ...

Paul

IT- Sales Trainer & Coach

Award-winning global thought- leader in the IT & Software Sales enablement space. A graduate of the Virginia Military Institute, Paul has over twenty-five years of experience ...

Mitch

Tech- Sales Trainer & Coach

Mitch has over 30 years of proven success and experience of senior executive experience and leading global enterprise sales teams. He has driven sales success....

Shannon Helms

Healthcare & Insurance Technology Sales Executive

"I have 20 years of consultative selling experience which includes successfully selling coaching and training to diverse industries. Throughout my career, I have taken at least 15 different assessments generally scoring at the top regarding being a sales hunter. I found this quiz to be rather unique in that depending on one's experience level, there might be a different "right" answer. I imagine this may be partly by design"

Thato K.

What I liked most was how the course gave me confidence. Prospecting always felt like throwing darts blindfolded, but the predictive frameworks gave me structure.

I now know what to look for and how to organize my pipeline.

George Dumitru

Regional Sales Manager, North America at Oracle

Since I joined Oracle, two years ago, I had the opportunity to attend a few training sessions facilitated by Paul, covering sales, management or coaching areas and I could say that these were the most engaging sessions I've ever had the chance to attend. Paul has an unique way to keep the people connected and to get everyone involved during the training and this helped myself and the team I managed to assimilate most of the information and to upgrade our sales skills to another level. Managing a team of sales professionals, covering both EMEA and NAMER regions and being able to see a rapid improvement of our sales metric, with great results amount the team, I can say that I strongly recommend Paul to any organization that wants to improve the skills of their sales employees rapidly and consistently.

Most training companies sell a one-time event. We provide Intellectual Infrastructure.

Feature	Regular Training Companies	TALSMART Solution
Duration	2-5 day "Bootcamp" (Quickly forgotten)	Continuous Reinforcement (AI + Human Coaching)
Methodology	Generic (MEDDIC/SPIN)	Neuroscience-based stage-based execution specific to Tech/Digital
Technology	PowerPoints and Workbooks	Movie/Video based learning with 3D analytical models
Focus	"What" to say	"How" to execute and scale through systems
Outcome	Temporary motivation boost	Permanent "Revenue Execution System"

TRANSFORMATION INVESTMENT

Phase 1. Revenue-Gap Diagnostic - \$100 per participant (One time)

What's included:

Structural Blueprint: A quantitative assessment and customized report (exposing revenue leak map on a per sales stage level) of your team's current performance against the top 4% of industry elite performers.

Phase 2. Tech Sales Mastery Program - \$1000 per participant (One time)

What's Included:

On Demand Stage-Specific Cinematic Training with LMS access: Specialized modules focusing on the unique skills required for complex, non-linear digital sales cycles along with 3D-Neuro models (like Business Environment and Lead Quality Analysis and more) and practice toolkit

Phase 3. Sales Execution Reinforcement - \$1000 per day (ongoing, we recommend a minimum of 2 months of engagement)

What's Included:

Systemic Coaching: Direct alignment sessions and mentorship from veteran sales operators with leadership backgrounds at Google, IBM, and Oracle.

Live Deal Reviews: "In-the-trenches" support to prevent skill decay by auditing current pipelines and refining active deal strategies.

Burnout Prevention: Decoupling revenue growth from human exhaustion by implementing repeatable execution systems that drive consistent, high-status output.

Total Initial Investment for 21 AEs:

- Phase 1 & 2 (Diagnostic + Mastery): \$23,100
- Phase 3 (Execution): \$1,000 per scheduled coaching day

Future Consideration: The Revenue Sustainability Ecosystem

Phase 4: AI-Driven Performance & Signal Intelligence

1. CoachRobo.ai – The 24/7 AI Sales Mentor

The Solution: Individual licenses for all 21 Account Executives.

Why It Matters: Managers cannot be on every call, and reps often hesitate to "fail" in front of leadership. ROBO provides a judgment-free "flight simulator" for sales.

- **Always-Live AI Coach:** ROBO scores every sales call (analyzing audio and video) at every stage of the sales cycle and triggers sales assessment and personalized coaching whenever performance dips. Nudging and helping reps to close more.
- **Real-Time Feedback:** The AI analyzes tone, pacing, and adherence to the TALSMART "Revenue Execution System," providing instant scores and coaching tips.
- **Muscle Memory:** It ensures that by the time an AE gets on a live call with a high-value prospect, they have already "won" the conversation five times in practice.

2. Signal Foundry – The "Nexus-Flow" Revenue Engine

The Solution: Access to the proprietary Signal Foundry framework

How the NBC activation layer works.

Signals come in, get cleaned, pass through rules, and move into a queue only if they are worth acting on for the NBC team.

Why It Matters: In digital sales, timing is everything. Signal Foundry transforms raw market data into "Actionable Intent Signals."

- **Buyer Intent Mapping:** Instead of "cold" prospecting, your team receives alerts when a target account shows specific digital behaviors (competitor research, tech stack changes, or leadership shifts).
- **Unified Execution:** It aligns the "one mind" of your sales team by providing a single source of truth for which deals are most likely to close, allowing for surgical resource allocation.
- **Predictive Growth:** It moves the team from being reactive to being proactive, identifying "Revenue Leaks" before they happen.
