

REVENUE GROWTH PROPOSAL

"A successful sales team is a group of many hands and one mind"

The Vision: AE Digital Sales Excellence

Individual talent wins segments, but a unified intellectual architecture dominates markets; we transform twenty-one distinct contributors into a singular, synchronized engine of strategic execution

Target Audience & Scope

- **Role:** Individual Contributors / Account Executives.
- **Team Size:** 21 participants.
- **Location:** In-person (Los Angeles, CA).

Core Objectives

Transform your team of 21 Account Executives into a unified, high-output force. The primary goal is to **boost confidence and technical proficiency** in modern business development, with a focus on:

- **Digital/Non-Linear Growth:** Specialized focus on navigating and closing digital-side opportunities.
- **Full-Funnel Mastery:** Enhancing skills across the board, from initial prospecting to final closing.
- **New Business Development:** Equipping the team with a refreshed toolkit to identify and secure untapped revenue streams.

The Solution: The Revenue Execution System

Most sales training is generic and pushes a single methodology (like MEDDIC, SPIN, Challenger, or Sandler). These frameworks help with overall understanding, but no single methodology works across every stage of a complex tech/IT/Software sales cycle.

At TALSMART, we focus on the **specific skills required at each stage of the digital sales process**, because selling a digital solution is not a transaction of physical goods.

And before you know what to improve, you need to diagnose where the reps stand w.r.t the 4% industry elite, pertaining to their understanding of each sales stage (Prospecting > Qualification > Discovery > Solution/Demo > Negotiation-Close)

Sales methodologies explain what to do. We build the skills and execution systems needed to win at every stage of the deal because winning complex deals requires different capabilities at each step.

The Transformation Roadmap

1. Revenue-Gap Diagnostic

Identify what's really holding revenue back → **Identify the Gap**

- Benchmark the team against elite tech sales organizations
- Identify skill gaps, pipeline inefficiencies, and deal execution issues
- Pinpoint where revenue is leaking across the sales cycle

Outcome: A clear map of what must change to unlock growth.

2. Tech Sales Mastery Program

Upgrade the team's selling capability → **Strengthen the Skill**

- Structured training built to focus on specific skills required at each stage of the complex digital sales process

- Objection handling, deal strategy, and competitive positioning
- Neuroscience-based learning to make skills stick

Outcome: Modern Digital Sales Playbook - Building skills and execution systems needed to win at every stage of the deal

3D-Neuro Models

Business Environment Analysis Model

Lead Quality Analysis Model

3. Sales Execution Coaching

Turn training into real revenue outcomes → **Drive Execution**

- Ongoing coaching with elite sales operators
- Deal reviews, pipeline strategy, and execution reinforcement
- Prevent skill decay and ensure adoption in live deals

Outcome: Consistent execution across the sales organization.

Combined 100+ years of enterprise sales leadership in companies like **Google, IBM, Oracle** and others your team sells to or competes against.

TALSMART

Shannon Helms

Healthcare & Insurance Technology Sales Executive

"I have 20 years of consultative selling experience which includes successfully selling coaching and training to diverse industries. Throughout my career, I have taken at least 15 different assessments generally scoring at the top regarding being a sales hunter. I found this quiz to be rather unique in that depending on one's experience level, there might be a different "right" answer. I imagine this may be partly by design"

Thato K.

What I liked most was how the course gave me confidence. Prospecting always felt like throwing darts blindfolded, but the predictive frameworks gave me structure. I now know what to look for and how to organize my pipeline.

George Dumitru

Regional Sales Manager, North America at Oracle

Since I joined Oracle, two years ago, I had the opportunity to attend a few training sessions facilitated by Paul, covering sales, management or coaching areas and I could say that these were the most engaging sessions I've ever had the chance to attend. Paul has an unique way to keep the people connected and to get everyone involved during the training and this helped myself and the team I managed to assimilate most of the information and to upgrade our sales skills to another level. Managing a team of sales professionals, covering both EMEA and NAMER regions and being able to see a rapid improvement of our sales metric, with great results amount the team, I can say that I strongly recommend Paul to any organization that wants to improve the skills of their sales employees rapidly and consistently.
